Rehan Ali

+92-323-0298501 | rehanalikhan4790@gmail.com | linkedin.com/in/rehanaliaiml | github.com/rehanali4790 | Portfolio

Summary

AI/ML Engineer specializing in production-grade LLM, Voice AI, and Computer Vision systems with 5+ years delivering scalable AI pipelines across government, enterprise SaaS, and automation platforms. Experienced in building and deploying automated trading bots, quantitative strategies, and backtesting frameworks alongside hands-on manual trading in Forex, CFDs, Stocks, and Options. Expert in architecting end-to-end MLOps workflows from research to deployment, with proven ability to reduce operational costs by 60–75% through intelligent automation. Track record of building 10+ production AI platforms serving 50K+ users across HR tech, fintech, healthcare, and law enforcement domains.

Education

NED University of Engineering and Technology — Karachi, Pakistan
Master of Science in Artificial Intelligence — *Expected Dec. 2025*

NED University of Engineering and Technology — Karachi, Pakistan
Bachelor of Engineering in Mechanical Engineering — *Oct. 2023*

Experience

Full Stack AI Developer — Oct. 2024 – Present
GCS Pvt LTD — *Karachi, Pakistan*

- Lead AI engineering team architecting enterprise AI solutions for government and private sectors, managing 3-member team and establishing MLOps best practices across projects
- Architected Media Monitoring Platform processing 150K+ daily broadcast records from TV, radio, and digital sources with 92% accuracy using speech-to-text and NLP sentiment analysis
- Deployed ANPR System for Government of Sindh tracking 200K+ vehicles monthly across 50+ checkpoints using YOLOv8, achieving 94% license plate recognition accuracy and reducing manual surveillance by 85%
- Built end-to-end AI Recruitment Platform automating hiring lifecycle for 8 departments, processing 500+ applications monthly and reducing HR operational time by 75%
- Engineered CrimeRAG, an AI agentic platform for law enforcement processing 10K+ case records, enabling pattern recognition across criminal profiles and reducing investigation time by 65% through semantic search and multi-agent orchestration
- Built real-time Voice AI agents using OpenAI Realtime API and Pipecat framework for low-latency voice bots, integrating Telnyx Voice API with TeXML IVR and Twilio TwiML to automate inbound/outbound call workflows across government and enterprise deployments
- Implemented MLOps infrastructure using MLflow and Databricks, establishing CI/CD pipelines that reduced model deployment time from 3 days to 4 hours with automated testing and monitoring

AI Engineer — Apr. 2023 – Oct. 2024
GCS Pvt LTD — *Karachi, Pakistan*

- Deployed Financial Research RAG system processing 10K+ monthly queries with 95% accuracy, reducing analyst research time by 60% through real-time insights from 100K+ documents
- Fine-tuned computer vision models for healthcare and e-commerce applications, improving accuracy by 25% and processing 50K+ images daily
- Built OCR extraction system handling 15K+ documents monthly, automating data workflows and reducing manual processing by 70%

AI/ML Consultant (Part-time, Remote) — Oct. 2024 – Present
Techfy Solutions — *New York, USA*

- Provide AI/ML consulting for 5+ concurrent SaaS projects, delivering technical architecture and implementation for real-time analytics and automation systems
- Developed voice website bots using Pipecat framework for sub-200ms latency voice interactions, and built telephony-integrated voice agents via Telnyx TeXML IVR and Twilio TwiML for automated customer support pipelines
- Engineered emotion analytics for Crowdora streaming platform, processing 50K+ daily messages with NLP sentiment analysis, improving streamer engagement insights by 40%
- Developed AI coding assistant for C2D platform enabling natural language code generation and GitHub integration, reducing deployment time by 65%

- Built Django backend integrating Microsoft Dynamics 365 for Teachy platform, creating unified dashboard tracking 2K+ student records and mentor analytics

AI Developer (Freelance) Nov. 2019 – Oct. 2024
Fiverr, Upwork, Guru *Remote*

- Delivered 75+ AI/ML projects across healthcare, retail, fintech, and industrial sectors, maintaining 4.9/5 average rating with 100% on-time delivery
- Built conversational voice agents using OpenAI Realtime API and Twilio TwiML for healthcare clients, automating 5K+ monthly patient inquiries and increasing appointment bookings by 35%
- Deployed recommendation engine for e-commerce client serving 50K+ users, boosting engagement by 25% through collaborative filtering
- Implemented predictive maintenance system reducing industrial equipment downtime by 20% across 30+ machines through time-series analysis
- Designed and delivered automated trading bots and algorithmic strategies for clients across Forex, CFD, and Crypto markets; built backtesting pipelines, technical indicator signal engines, and risk management modules integrated with MT5 and exchange APIs

Featured Projects

ConvertoAI | *Python, React, LangChain, LLMs, Vector DBs, FastAPI* | convertoai.vercel.app 2024 – Present

- Built enterprise AI agent creation platform enabling businesses to deploy custom chatbots and automation workflows without code
- Architected multi-agent orchestration system processing 100K+ conversations monthly with context-aware responses and tool integration
- Implemented RAG pipeline with vector embeddings supporting 500+ concurrent agents across diverse business domains
- Integrated real-time analytics dashboard tracking agent performance, user engagement, and conversation insights

JobBuddy | *Python, React, LLMs, RAG, PostgreSQL, OpenAI API* | jobuddyai.vercel.app 2023 – Present

- Built full-stack AI career mentoring platform serving 5K+ users with resume optimization, job matching, and interview preparation
- Achieved 45% improvement in candidate-job match rates through semantic NLP analysis and ATS optimization
- Integrated real-time job market APIs providing salary insights and career recommendations from 100K+ listings

HireFlow AI | *Python, FastAPI, Voice AI, OpenAI Realtime API, Pipecat, React* | hireflow-chi.vercel.app 2024

- Created AI-powered recruitment platform processing 10K+ interviews with 95% candidate quality match, reducing hiring time by 87%
- Engineered real-time voice interview system using OpenAI Realtime API and Pipecat for low-latency audio streaming, with dynamic question adaptation and automated scoring
- Implemented bias-free ML ranking algorithms ensuring fair assessments across diverse candidate pools

PropEdge AI | *Python, React, LLMs, Time-series Analysis, Trading APIs* | propedge-ai-rho.vercel.app 2024

- Developed AI trading psychology and analytics platform serving 2K+ retail traders with personalized mental coaching and behavioral analysis
- Built automated trading bots and algorithmic strategies for Forex, CFD, Stock, and Options markets; implemented backtesting frameworks with walk-forward optimization and live signal execution via MT5 and broker APIs
- Engineered emotion detection and NLP sentiment analysis on trade journals, identifying psychological biases and reducing emotional trading decisions by 40%
- Implemented ML-powered journaling with performance dashboards covering win rate, drawdown, risk-reward, and equity curve tracking

CrimeRAG | *Python, LangChain, Multi-Agent Systems, Graph DBs, Neo4j* 2024

- Engineered AI agentic platform for law enforcement automating criminal investigation workflows and pattern recognition
- Built multi-agent orchestration system processing case files, witness statements, and forensic data to identify connections
- Implemented graph-based knowledge retrieval linking criminal profiles, locations, and modus operandi across 50K+ records
- Reduced investigation time by 65% through semantic search and automated evidence correlation

SocialPilotAI | *Python, React, LLMs, Social Media APIs* 2024

- Developed automation platform for cross-platform social media posting with LLM-powered content generation
- Built ML scheduling optimizer analyzing audience patterns to maximize post engagement rates by 30%
- Integrated multi-platform APIs for seamless content distribution across Twitter, LinkedIn, and Instagram

Technical Skills

Languages: Python, JavaScript, SQL, HTML/CSS, TypeScript
AI/ML: TensorFlow, PyTorch, LangChain, LlamaIndex, Hugging Face, YOLOv8, Scikit-learn, OpenAI API, Anthropic Claude
Trading: Algorithmic Trading Bots, Strategy Backtesting, Manual Trading, Forex, CFDs, Stocks, Options, MT5 API, ccxt, TA-Lib, Technical Analysis, Risk Management
Voice AI: OpenAI Realtime API, Pipecat Framework, Telnyx Voice API, TeXML IVR, Twilio TwiML, Real-time Voice Bots
MLOps: MLflow, Databricks, Apache Airflow, Docker, Kubernetes, CI/CD, Model Versioning, A/B Testing
Frameworks: React, Next.js, Node.js, Django, Flask, FastAPI, Streamlit
Databases: PostgreSQL, MongoDB, Pinecone, Weaviate, ChromaDB, Neo4j, Redis
Cloud: AWS (EC2, S3, Lambda, SageMaker), Azure, GCP, Vercel, Railway
Specializations: LLMs, RAG, Multi-Agent Systems, Computer Vision, NLP, OCR, Voice AI, ANPR, Agentic AI

Certifications & Publications

Certifications: PMP – IBM Data Science – Deep Learning Specialization – ML Specialization – Azure Associate Developer – Hola Prime Funded Trader (Mar 2025)
Open Source: Active contributor to LangChain community with 5+ merged PRs for RAG optimization and agent orchestration
